Save Energy—Please Turn Me Off!

Small appliances are often inefficient devices that also may be fire hazards. They are "energy hogs"!

ENERGY STAR products are independently certified to save energy without sacrificing features or functionality.

Turn off or unplug devices when not in use to prevent energy waste.

Conserving energy can be as simple as turning off the lights when the natural light from windows is adequate.

Power strips are an easy switch for multiple devices.

Post "Please Turn Me Off" reminders on small appliances and light switches.

Homeowners can save money on their home energy improvements through the end of 2013 by taking advantage of the extended Federal tax credit.

Purchase only Energy Star electrical equipment for the office and home, where available. www.energystar.gov
